

Vision AI Solutions That Advance Just About Everything

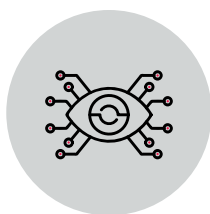

Vision AI solutions have the potential to advance every aspect of your business, from the customer experience to back-end operations. Deploy vision AI technology to enhance security, automate infrastructure, optimize labor resources and reduce downtime. By leveraging real-time vision AI, organizations can make informed decisions based on data analytics and alerts from sensor infrastructure that lends context to any situation.

Along with our ecosystem of best-of-breed hardware and software providers, Telaid offers validated turnkey AI solutions that enables customers to expedite deployments and realize business objectives sooner.

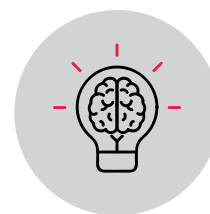

Vision AI delivers actionable insights based on data collected from sensors.

DERIVE ACTIONABLE CONCLUSION

Explore applications for vision AI to optimize performance across your organization.

Operations	Understand wait times, points of friction and customer behaviors to maximize revenues.
IT	Monitor devices and trigger predictive maintenance that optimizes uptime.
Physical Security	Flag dangerous situations using license plate recognition, spill and hazard identification that prevent security incidents and losses.
Customer Analytics	Unearth critical customer insights based on heatmaps and on-site behaviors.
Expedited Transactions	Enable fast, error-free frictionless checkout with vision AI that identifies items, eliminates scanning.
Inventory Management	Maintain awareness of stock levels in front and back-of-the-house.

Benefits of Vision AI

OPTIMIZE LABOR FORCE WITH BETTER ALLOCATION, INSTANT TRAINING AND STREAMLINED PROCESSES.

PREVENT SECURITY AND SAFETY BREACHES BY TAKING PREEMPTIVE ACTION.

STREAMLINE OPERATIONS, EXPEDITE PROCESSES AND IMPROVE THROUGHPUT.

SAVE MONEY BY ADDRESSING ISSUES BEFORE THEY BECOME PROBLEMS.

Partner with Telaid for Success

Telaid is your partner of choice for precision vision AI solution design, deployment and support.

We've made buying AI solutions simple.

Working closely with our ecosystem of technology partners, Telaid offers out-of-the-box solutions which includes NVIDIA accelerated software providers, tested and validated on GPU-enabled hardware systems that are purpose-built for AI workloads.

- Verify infrastructure supports optimal performance
- Specify hardware that securely, cost effectively supports vision AI
- Handle precise deployment of cameras to capture required video depending on desired application
- Install DeviceWatch, Telaid's device management platform designed to proactively monitor device health, reduce downtime
- Offer customized support contract for break-fix support

About Telaid

Telaid helps enterprise clients accelerate technology adoption to achieve their business objectives. We design, deploy and support critical technologies, reducing time, task, cost and risk associated with managing technologies in complex, multi-site environments. Since 1981, Telaid has delivered service excellence and successful technology deployments, IT asset management, physical security solutions and technology support services.
